# INTRODUCING GAMES BY

## DEMON ATTACK™

An awesome array of demons attack a scientific colony on the Moon. You maneuver your laser cannon across the moonscape, returning fire in an attempt to destroy an entire army of cunning demons. The more demons you kill, the tougher the next wave of demons becomes.

Now you are left with but one choice. . .seek out the demons' home base and end their treachery forever! But as you approach their monstrous lair, your blood chills at an unspeakable horror, perhaps the last sight you'll ever see! Try to blast through the powerful forcefield to destroy the demons once and for all!

## ATLANTIS

Alien spacecraft bombard the underwater city of Atlantis. Centuries of progress seem doomed. But you can't let them win. . .you won't! You man the two defense installations, firing missiles by aiming with your cross hair sights. Hit the aliens before they get close enough to destroy Atlantis!

Soon dusk appears, and then night falls. Only the constantly moving searchlights allow you to see the enemy ships. Blinded by rage, you scramble into Atlantis' last defensive spaceship and fly into the enemy-filled skies. How long can one ship survive against so many? See how many days and nights you can protect Atlantis!

## BEAUTY & THE BEAST

That bully's got the girl. It's you to the rescue. Climb the building, floor by floor. But be careful! The fearsome foe is angrily tossing boulders at you. Dodge them. Watch out for flying birds and scurrying rats. Try to catch the hearts the girl throws to you.

They'll make you superstrong and allow you to squash all obstacles. . .but only for a little while. Chase the bully up the skyscraper and see how high you can climb. The higher you go, the harder the going gets!

# MICROSURGEON™

The patient is critically ill! Check the patient's status chart to see which vital organs need immediate attention. Then navigate the tiny robot probe through the blood stream, outmaneuvering white blood cells that attempt to destroy you as foreign matter. Eliminate brain

tumors, cholesterol in the arteries, and tar deposits on the lungs. Get rid of kidney stones, gallstones, and cleanse the intestinal tract of tapeworms. Fight bacteria and viruses — but hurry! To save the patient's life, you must finish quickly!
